

Introduction

Ultimate Purple Theme is a design kit for Perfex CRM and a beautiful theme module.

Requirements

- At least Perfex CRM version 2.3.2 - <https://codecanyon.net/item/perfex-powerful-open-source-crm/14013737>

How to install

You can install the **Ultimate Purple Theme** module in two ways, see below.

First Method - Using the Perfex installer

- Login as administrator in Perfex CRM and navigate to **Setup->Modules**.
- At the section upload module, from the downloaded .zip file from CodeCanyon select the **ultimate_purple_theme.zip** file and click Install.
- After the module is successfully uploaded/installed, you will **need to activate it by clicking on the activate link/button on the modules list table**.

If you have a module in a .zip format, you may install it by uploading it here.

* Upload Module

Choose File

No file chosen

INSTALL

Second Method - Through FTP

- In your Perfex CRM installation uploaded the contents of the **ultimate_purple_theme.zip** in the **/modules** directory.
- Login as administrator in Perfex CRM and navigate to **Setup->Modules** and **activate it by clicking on the activate button**.

Setup

Login as administrator in Perfex CRM and navigate to **Setup->Modules** and **activate** it by clicking on the activate button.

Note: If you have another themes enabled make sure that you disable them before activating Ultimate Purple Theme.

Customization

If you want to customize the theme eg. Change color adjust css the best is to create custom.css file as explained here and apply the changes.

<https://help.perfexcrm.com/applying-custom-css-styles/>

Upgrade

To upgrade **Ultimate Purple Theme** you can upload the newest downloaded **ultimate_purple_theme.zip** file in **Setup->Modules** or via FTP as explained in the second installation method.

After uploading the latest **Ultimate Purple Theme** version files, if **database upgrade** is required, Perfex CRM will ask you to upgrade the database, click on upgrade database and you will be all set.

Keep in mind that in most cases, you will need to clear your browser cache when new version is released because of CSS/JS changes.
